

User Manual

General Information

This Food Menu information is for "TINY PEBBLES FOOD MENU" customers and users that visit our restaurant and use this application.

This user manual is intended to serve a variety of functions. It is a handbook for new users who are learning how to use this application. This document can also be used as a source of knowledge and training.

This page offers a wealth of information regarding the TINY PEBBLES FOOD MENU, including order taking, database entry, and bill generation.

This Food Menu material was created by the team members of the TINY PEBBLES FOOD MENU Company, who work hard to provide the greatest services to their customers by offering high-quality dishes at reasonable costs, as well as excellent customer care. The members of the team have a combined experience of over ten years in the restaurant industry.

System Overview

Our system has a table where the customer's food ID, Food Name, Category, Spiciness, and Prices are entered. To begin, the user should enter the Food ID in the text field, followed by the name of the food. Choose a category based on the user's preferences. After that, select the spiciness to be applied in the order specified. In the field, enter the price of the ordered item. The user can then search for what order the customer placed from the table based on their price by selecting the food category.

The TINY PEBBELS FOOD MENU features a lot of buttons with various functions. To begin, the add button is used to enter the data into the table. Then there's the search button, which allows users to find the food name that has been provided by the customer by simply entering the product's price. The Clear button is used to clear the application's text field. We have a menu bar with an option to open a file, which allows us to import an excel sheet from the menu. In addition, there is an exit button that allows you to exit the application.

This Food menu information for "TINY PEBBLES FOOD MENU". The customer can choose the food according to their price

Getting Started

The user must follow the following instructions to run the system at its fully functional performance:

1. The zip file in which the program is located must be extracted.
